(54) Title: CANDLE EXTINGUISHER AND A METHOD FOR PRODUCING A CANDLE EXTINGUISHER

(57) Abstract: A candle extinguisher (10) comprising a unitary body of a thin-plate material, said body having a ring-shaped part (12) defining an inner space and having an inner diameter slightly exceeding the outer diameter of a candle on which the candle extinguisher is to be positioned, said body having a plurality of flexible finger elements (14) which extend upwardly from said ring-shaped part, and comprise a proximal part and a distal (16), said proximal parts extending in coplanar relationship with said ring-shaped part and being bendable from the coplanar relation outwardly relative to said inner space, each of said distal parts having a length at least exceeding one half of the width of said inner space.
